Studying in Afganistan

For twenty years, during the regime of the Taliban and the war, a normal university life was impossible for Afghan students. In 2002, the universities in Kabul opened again, and the country has started taking part in the academic life again. Some Afghan university students took part in an international congress in Germany recently, organised by the student organization AIESEC. Ralf Lehnert met two of the Afghan students, Raiyt Alamyar and Nasrat Khalil, and asked them what it's like to study in Kabul.
